

Dear FCC,

Please do not allow XM Radio and Sirius Radio to merge and keep all existing bandwidth licenced. This would clearly create a monopoly for licenseable air waves. It is the FCC's responsibility to ensure that no company can dominate all licensable air waves and prevent fair competition by other competitors. To restate my request:

1. If XM Radio and Sirius Radio merge, only one of the existing licenced bandwidths should be allowed.
2. If this is not clearly stated in the conditions of the merger then XM Radio and Sirius Radio should not be allowed to merge and create a monopoly.

Best Regards,
Miles Zarn
